

# MTH 4099

## Math Placement Acceleration Lab

### Winter 2023

This winter semester we are offering a **Math skills Lab** for students that need or want to brush-up on their math skills, increase their math level, and potentially complete their math requirements so they can finish their degree faster.

This acceleration course is just \$25.00.

Students will work using the [ALEKS](#) system to practice skills then retest with the support and guidance of a math instructor. Students can work from anywhere, anytime, at their own pace, and can increase their level in as short as 5 hours. This is a 12-week, open enrollment course where students can **join** the class at any time starting January 9 until April 1.

Three sections of the Math Skill Lab will be offered over the Winter semester:

MTH 4099	Section 01  CRN 15617 Tuesdays 9:00am – 10:00 am LA 223	Section 02 VCLASS CRN 15618 Wednesdays 12:30pm – 1:30 pm VCLASS	Section 03 VCLASS CRN 15619 Mondays 6:00pm – 7:00pm VCLASS
	Starts: January 9 – Ends: May 1		

We want our students to succeed, save time, credits, and money all at once. This course is recommended for all Reconnect and Frontliner students, or any student that just wants to save time and money while advancing in their studies. Do not miss out this great opportunity! Help us spread the word!

### Finish Fast! ... Finish Smart!
